2014 年硕士研究生入学考试英语一试题

Directions:

Read the following text. Choose the best word(s) for each numbered blank and mark A, B, C or D on the ANSWER SHEET. (10 points)

As many people hit middle age, they often start to notice that their memory and mental clarity are not what they used to be. We suddenly can't remember ___1___ we put the keys just a moment ago, or an old acquaintance's name, or the name of an old band we used to love. As the brain ___2___, we refer to these occurrences as "senior moments." ___3___ seemingly innocent, this loss of mental focus can potentially have a (n) ___4___ impact on our professional, social, and personal ___5___.

Neuroscientists, experts who study the nervous system, are increasingly showing that there's actually a lot that can be done. It ___6___ out that the brain needs exercise in much the same way our muscles do, and the right mental ___7___ can significantly improve our basic cognitive ___8___. Thinking is essentially a ___9___ of making connections in the brain. To a certain extent, our ability to ___10___ in making the connections that drive intelligence is inherited. ___11___, because these connections are made through effort and practice, scientists believe that intelligence can expand and fluctuate ___12___ mental effort.

Now, a new Web-based company has taken it a step ___13___ and developed the first “brain training program” designed to actually help people improve and regain their mental ___14___.

The Web-based program ___15___ you to systematically improve your memory and attention skills. The program keeps ___16___ of your progress and provides detailed feedback ___17___ your performance and improvement. Most importantly, it ___18___ modifies and enhances the games you play to ___19___ on the strengths you are developing—much like a(n) ___20___ exercise routine requires you to increase resistance and vary your muscle use.

1. [A]where [B]when [C]that [D]why
2. [A]improves [B]fades [C]recovers
[D]collapses
3. [A]If [B]Unless [C]Once [D]While
4. [A]uneven [B]limited [C]damaging [D]obscure
5. [A]wellbeing [B]environment [C]relationship [D]outlook
6. [A]turns [B]finds [C]points [D]figures
7. [A]roundabouts [B]responses [C]workouts [D]associations
8. [A]genre [B]functions [C]circumstances [D]criterion
9. [A]channel [B]condition [C]sequence [D]process
10. [A]persist [B]believe [C]excel [D]feature
11. [A] Therefore [B] Moreover [C] Otherwise [D] However
12. [A]according to [B]regardless of [C]apart from [D]instead of
13. [A]back [B]further [C]aside [D]around
14. [A]sharpness [B]stability [C]framework [D]flexibility
15. [A]forces [B]reminds [C]hurries [D]allows
16. [A]hold [B]track [C]order [D]pace
17. [A]to [B]with [C]for [D]on
18. [A]irregularly [B]habitually [C]constantly [D]unusually
19. [A]carry [B]put [C]build [D]take
20. [A]risky [B]effective [C]idle [D]familiar

Section II

Reading Comprehension

Part A**Directions:**

Read the following four texts. Answer the questions below each text by choosing A, B, C or D. Mark your answers on the ANSWER SHEET. (40 points)

Text 1

In order to “change lives for the better” and reduce “dependency” George Osborne, Chancellor of the Exchequer, introduced the “upfront work search” scheme. Only if the jobless arrive at the jobcentre with a CV, register for online job search, and start looking for work will they be eligible for benefit and then they should report weekly rather than fortnightly. What could be more reasonable?

More apparent reasonableness followed. There will now be a seven-day wait for the jobseeker’s allowance. “Those first few days should be spent looking for work, not looking to sign on.” he claimed. “We’re doing these things because we know they help people stay off benefits and help those on benefits get into work faster.” Help? Really? On first hearing, this was the socially concerned chancellor, trying to change lives for the better, complete with “reforms” to an obviously indulgent system that demands too little effort from the newly unemployed to find work, and subsidises laziness. What motivated him, we were to understand, was his zeal for “fundamental fairness” — protecting the taxpayer, controlling spending and ensuring that only the most deserving claimants received their benefits.

Losing a job is hurting: you don’t skip down to the jobcentre with a song in your heart, delighted at the prospect of doubling your income from the generous state. It is financially terrifying, psychologically embarrassing and you know that support is minimal and extraordinarily hard to get. You are now not wanted; your support is minimal and extraordinarily hard to get. You are now not wanted; you are now excluded from the work environment that offers purpose and structure in your life. Worse, the crucial income to feed yourself and your family and pay the bills has disappeared. Ask anyone newly unemployed what they want and the answer is always: a job.

But in Osborneland, your first instinct is to fall into dependency — permanent dependency if you can get it — supported by a state only too ready to indulge your falsehood. It is as though 20 years of ever-tougher reforms of the job search and benefit administration system never happened. The principle of British welfare is no longer that you can insure yourself against the risk of unemployment and receive unconditional payments if the disaster happens. Even the very phrase “jobseeker’s allowance” — invented in 1996 — is about redefining the unemployed as a “jobseeker” who had no mandatory right to a benefit he or she has earned through making national insurance contributions.

Instead, the claimant receives a time-limited “allowance,” conditional on actively seeking a job; no entitlement and no insurance, at 71.70 a week, one of the least generous in the EU.

21. George Osborne’s scheme was intended to

- [A] provide the unemployed with easier access to benefits.
- [B] encourage jobseekers’ active engagement in job seeking.
- [C] motivate the unemployed to report voluntarily.
- [D] guarantee jobseekers’ legitimate right to benefits.

22. The phrase, “to sign on” (Line 3, Para. 2) most probably means

- [A] to check on the availability of jobs at the jobcentre.
- [B] to accept the government’s restrictions on the allowance.
- [C] to register for an allowance from the government.
- [D] to attend a governmental job-training program.

23. What prompted the chancellor to develop his scheme?

- [A] A desire to secure a better life for all.
- [B] An eagerness to protect the unemployed.
- [C] An urge to be generous to the claimants.
- [D] A passion to ensure fairness for taxpayers.

24. According to Paragraph 3, being unemployed makes one feel

- [A] uneasy
- [B] enraged.
- [C] insulted.
- [D] guilty.

25. To which of the following would the author most probably agree?

- [A] The British welfare system indulges jobseekers’ laziness.
- [B] Osborne’s reforms will reduce the risk of unemployment.
- [C] The jobseekers’ allowance has met their actual needs.
- [D] Unemployment benefits should not be made conditional.

Text 2

All around the world, lawyers generate more hostility than the members of any other profession—with the possible exception of journalism. But there are few places where clients have more grounds for complaint than America.

During the decade before the economic crisis, spending on legal services in America grew twice as fast as inflation. The best lawyers made skyscrapers—full of money, tempting ever more students to pile into law

schools. But most law graduates never get a big-firm job. Many of them instead become the kind of nuisance-lawsuit filer that makes the tort system a costly nightmare.

There are many reasons for this. One is the excessive costs of a legal education. There is just one path for a lawyer in most American states: a four-year undergraduate degree in some unrelated subject, then a three-year law degree at one of 200 law schools authorized by the American Bar Association and an expensive preparation for the bar exam. This leaves today's average law-school graduate with \$100,000 of debt on top of undergraduate debts. Law-school debt means that many cannot afford to go into government or non-profit work, and that they have to work fearsomely hard.

Reforming the system would help both lawyers and their customers. Sensible ideas have been around for a long time, but the state-level bodies that govern the profession have been too conservative to implement them. One idea is to allow people to study law as an undergraduate degree. Another is to let students sit for the bar after only two years of law school. If the bar exam is truly a stern enough test for a would-be lawyer, those who can sit it earlier should be allowed to

do so. Students who do not need the extra training could cut their debt mountain by a third.

The other reason why costs are so high is the restrictive guild-like ownership structure of the business. Except in the District of Columbia, non-lawyers may not own any share of a law firm. This keeps fees high and innovation slow. There is pressure for change from within the profession, but opponents of change among the regulators insist that keeping outsiders out of a law firm isolates lawyers from the pressure to make money rather than serve clients ethically.

In fact, allowing non-lawyers to own shares in law firms would reduce costs and improve services to customers, by encouraging law firms to use technology and to employ professional managers to focus on improving firms' efficiency. After all, other countries, such as Australia and Britain, have started liberalizing their legal professions. America should follow.

26. a lot of students take up law as their profession due to

[A] the growing demand from clients.

[B] the increasing pressure of inflation.

[C]the prospect of working in big firms.

[D]the attraction of financial rewards.

27. Which of the following adds to the costs of legal education in most American states?

[A]Higher tuition fees for undergraduate studies.

[B]Admissions approval from the bar association.

[C]Pursuing a bachelor's degree in another major.

[D]Receiving training by professional associations.

28. Hindrance to the reform of the legal system originates from

[A]lawyers' and clients' strong resistance.

[B]the rigid bodies governing the profession.

[C]the stem exam for would-be lawyers.

[D]non-professionals' sharp criticism.

29. The guild-like ownership structure is considered "restrictive" partly because it

[A]bans outsiders' involvement in the profession.

[B]keeps lawyers from holding law-firm shares.

[C]aggravates the ethical situation in the trade.

[D]prevents lawyers from gaining due profits.

30. In this text, the author mainly discusses

[A]flawed ownership of America's law firms and its causes.

[B]the factors that help make a successful lawyer in America.

[C]a problem in America's legal profession and solutions to it.

[D]the role of undergraduate studies in America's legal education.

Text 3

The US\$3-million Fundamental physics prize is indeed an interesting experiment, as Alexander Polyakov said when he accepted this year's award in March. And it is far from the only one of its type. As a News Feature article in Nature discusses, a string of lucrative awards for researchers have joined the Nobel Prizes in recent years. Many, like the Fundamental Physics Prize, are funded from the telephone-number-sized bank accounts of Internet entrepreneurs. These benefactors have succeeded in their chosen fields, they say, and they want to use their wealth to draw attention to those who have succeeded in science.

What's not to like? Quite a lot, according to a handful of scientists quoted in the News Feature. You cannot buy class, as the old saying goes,

and these upstart entrepreneurs cannot buy their prizes the prestige of the Nobels, The new awards are an exercise in self-promotion for those behind them, say scientists. They could distort the achievement-based system of peer-review-led research. They could cement the status quo of peer-reviewed research. They do not fund peer-reviewed research. They perpetuate the myth of the lone genius.

The goals of the prize-givers seem as scattered as the criticism. Some want to shock, others to draw people into science, or to better reward those who have made their careers in research.

As Nature has pointed out before, there are some legitimate concerns about how science prizes—both new and old—are distributed. The Breakthrough Prize in Life Sciences, launched this year, takes an unrepresentative view of what the life sciences include. But the Nobel Foundation's limit of three recipients per prize, each of whom must still be living, has long been outgrown by the collaborative nature of modern research—as will be demonstrated by the inevitable row over who is ignored when it comes to acknowledging the discovery of the Higgs boson. The Nobels were, of course, themselves set up by a very rich individual who had decided what he wanted to do with his own money. Time, rather than intention, has given them legitimacy.

As much as some scientists may complain about the new awards, two things seem clear. First, most researchers would accept such a prize if they were offered one. Second, it is surely a good thing that the money and attention come to science rather than go elsewhere, It is fair to criticize and question the mechanism—that is the culture of research, after all—but it is the prize-givers' money to do with as they please. It is wise to take such gifts with gratitude and grace.

31. The Fundamental Physics Prize is seen as

- [A] a symbol of the entrepreneurs' wealth.
- [B] a possible replacement of the Nobel Prizes.
- [C] an example of bankers' investments.
- [D] a handsome reward for researchers.

32. The critics think that the new awards will most benefit

- [A] the profit-oriented scientists.
- [B] the founders of the new awards.
- [C] the achievement-based system.
- [D] peer-review-led research.

33. The discovery of the Higgs boson is a typical case which involves
- [A] controversies over the recipients' status.
 - [B] the joint effort of modern researchers.
 - [C] legitimate concerns over the new prizes.
 - [D] the demonstration of research findings.
34. According to Paragraph 4, which of the following is true of the Nobels?
- [A] Their endurance has done justice to them.
 - [B] Their legitimacy has long been in dispute.
 - [C] They are the most representative honor.
 - [D] History has never cast doubt on them.
35. The author believes that the now awards are
- [A] acceptable despite the criticism.
 - [B] harmful to the culture of research.
 - [C] subject to undesirable changes.
 - [D] unworthy of public attention.

Text 4

“The Heart of the Matter,” the just-released report by the American Academy of Arts and Sciences (AAAS), deserves praise for affirming the importance of the humanities and social sciences to the prosperity and security of liberal democracy in America. Regrettably, however, the report's failure to address the true nature of the crisis facing liberal education may cause more harm than good.

In 2010, leading congressional Democrats and Republicans sent letters to the AAAS asking that it identify actions that could be taken by “federal, state and local governments, universities, foundations, educators, individual benefactors and others” to “maintain national excellence in humanities and social scientific scholarship and education.” In response, the American Academy formed the Commission on the Humanities and Social Sciences. Among the commission's 51 members are top-tier-university presidents, scholars, lawyers, judges, and business executives, as well as prominent figures from diplomacy, filmmaking, music and journalism.

The goals identified in the report are generally admirable. Because representative government presupposes an informed citizenry, the report supports full literacy; stresses the study of history and government, particularly American history and American government; and encourages the use of new digital technologies. To encourage innovation and competition,

the report calls for increased investment in research, the crafting of coherent curricula that improve students' ability to solve problems and communicate effectively in the 21st century, increased funding for teachers and the encouragement of scholars to bring their learning to bear on the great challenges of the day. The report also advocates greater study of foreign languages, international affairs and the expansion of study abroad programs.

Unfortunately, despite 2 years in the making, "The Heart of the Matter" never gets to the heart of the matter: the illiberal nature of liberal education at our leading colleges and universities. The commission ignores that for several decades America's colleges and universities have produced graduates who don't know the content and character of liberal education and are thus deprived of its benefits. Sadly, the spirit of inquiry once at home on campus has been replaced by the use of the humanities and social sciences as vehicles for publicizing "progressive," or left-liberal propaganda.

Today, professors routinely treat the progressive interpretation of history and progressive public policy as the proper subject of study while portraying conservative or classical liberal ideas—such as free markets and self-reliance—as falling outside the boundaries of routine, and sometimes legitimate, intellectual investigation.

The AAAS displays great enthusiasm for liberal education. Yet its report may well set back reform by obscuring the depth and breadth of the challenge that Congress asked it to illuminate.

36. According to Paragraph 1, what is the author's attitude toward the AAAS's report?

- [A] Critical
- [B] Appreciative
- [C] Contemptuous
- [D] Tolerant

37. Influential figures in the Congress required that the AAAS report on how to

- [A] retain people's interest in liberal education
- [B] define the government's role in education
- [C] keep a leading position in liberal education
- [D] safeguard individuals' rights to education

38. According to Paragraph 3, the report suggests
- [A] an exclusive study of American history
 - [B] a greater emphasis on theoretical subjects
 - [C] the application of emerging technologies
 - [D] funding for the study of foreign languages
39. The author implies in Paragraph 5 that professors are
- [A] supportive of free markets
 - [B] cautious about intellectual investigation
 - [C] conservative about public policy
 - [D] biased against classical liberal ideas
40. Which of the following would be the best title for the text?
- [A] Ways to Grasp “The Heart of the Matter”
 - [B] Illiberal Education and “The Heart of the Matter”
 - [C] The AAAS’ s Contribution to Liberal Education
 - [D] Progressive Policy vs. Liberal Education Part B

Directions:

The following paragraphs are given in a wrong order. For Questions 41-45, you are required to reorganize these paragraphs into a coherent text by choosing from the list A-G and filling them into the numbered boxes. Paragraphs A and E have been correctly placed Mark your answers on the ANSWER SHEET (10 points)

[A] Some archaeological sites have always been easily observable—for example, the Parthenon in Athens, Greece, the pyramids of Giza in Egypt; and the megaliths of Stonehenge in southern England. But these sites are exceptions to the norm. Most archaeological sites have been located by means of careful searching, while many others have been discovered by accident. Olduvai Gorge, an early hominid site in Tanzania, was found by a butterfly hunter who literally fell into its deep valley in 1911. Thousands of Aztec artifacts came to light during the digging of the Mexico City subway in the 1970s.

[B] In another case, American archaeologists Rene Millon and George Cowgill spent years systematically mapping the entire city of Teotihuacan in the Valley of Mexico near what is now Mexico City. At its peak around AD 600, this city was one of the largest human settlements in the world. The researchers mapped not only the city’ s vast and ornate ceremonial areas, but also hundreds of simpler apartment complexes where common people lived.

[C] How do archaeologists know where to find what they are looking for when there is nothing visible on the surface of the ground? Typically, they survey and sample (make test excavations on) large areas of terrain to determine where excavation will yield useful information. Surveys and test samples have also become important for understanding the larger landscapes that contain archaeological sites.

[D] Surveys can cover a single large settlement or entire landscapes. In one case, many researchers working around the ancient Maya city of Copan, Honduras, have located hundreds of small rural villages and individual dwellings by using aerial photographs and by making surveys on foot. The resulting settlement maps show how the distribution and density of the rural population around the city changed dramatically between AD 500 and 850, when Copan collapsed.

[E] To find their sites, archaeologists today rely heavily on systematic survey methods and a variety of high-technology tools and techniques. Airborne technologies, such as different types of radar and photographic equipment carried by airplanes or spacecraft, allow archaeologists to learn about what lies beneath the ground without digging. Aerial surveys locate general areas of interest or larger buried features, such as ancient buildings or fields.

[F] Most archaeological sites, however, are discovered by archaeologists who have set out to look for them. Such searches can take years. British archaeologist Howard Carter knew that the tomb of the Egyptian pharaoh Tutankhamun existed from information found in other sites. Carter sifted through rubble in the Valley of the Kings for seven years before he located the tomb in 1922. In the late 1800s British archaeologist Sir Arthur Evans combed antique dealers' stores in Athens, Greece. He was searching for tiny engraved seals attributed to the ancient Mycenaean culture that dominated Greece from the 1400s to 1200s BC. Evans' interpretations of these engravings eventually led him to find the Minoan palace at Knossos (Knossós) on the island of Crete, in 1900.

[G] Ground surveys allow archaeologists to pinpoint the places where digs will be successful. Most ground surveys involve a lot of walking, looking for surface clues such as small fragments of pottery. They often include a certain amount of digging to test for buried materials at selected points across a landscape. Archaeologists also may locate buried remains by using such technologies as ground radar, magnetic-field

recording, and metal detectors. Archaeologists commonly use computers to map sites and the landscapes around sites. Two and three-dimensional maps are helpful tools in planning excavations, illustrating how sites look, and presenting the results of archaeological research.

41. → A →42. → E →43. → 44. →45.

Part C

Directions:

Read the following text carefully and then translate the underlined segments into Chinese. Your translation should be written neatly on the ANSWER SHEET. (10 points)

Music means different things to different people and sometimes even different things to the same person at different moments of his life. It might be poetic, philosophical, sensual, or mathematical, but in any case it must, in my view, have something to do with the soul of the human being. Hence it is metaphysical; but the means of expression is purely and exclusively physical: sound. I believe it is precisely this permanent coexistence of metaphysical message through physical means that is the strength of music. (46) It is also the reason why when we try to describe music with words, all we can do is articulate our reactions to it, and not grasp music itself.

Beethoven's importance in music has been principally defined by the revolutionary nature of his compositions. He freed music from hitherto prevailing conventions of harmony and structure. Sometimes I feel in his late works a will to break all signs of continuity. The music is abrupt and seemingly disconnected, as in the last piano sonata. In musical expression, he did not feel restrained by the weight of convention. (47) By all accounts he was a freethinking person, and a courageous one, and I find courage an essential quality for the understanding, let alone the performance, of his works.

This courageous attitude in fact becomes a requirement for the performers of Beethoven's music. His compositions demand the performer to show courage, for example in the use of dynamics. (48) Beethoven's habit of increasing the volume with an intense crescendo and then abruptly following it with a sudden soft passage was only rarely used by composers before him.

Beethoven was a deeply polit

ical man in the broadest sense of the word. He was not interested in daily politics, but concerned with questions of moral behavior and the larger questions of right and wrong affecting the entire society. (49)Especially significant was his view of freedom, which, for him, was associated with the rights and responsibilities of the individual: he advocated freedom of thought and of personal expression.

Beethoven's music tends to move from chaos to order as if order were an imperative of human existence. For him, order does not result from forgetting or ignoring the disorders that plague our existence; order is a necessary development, an improvement that may lead to the Greek ideal of spiritual elevation. It is not by chance that the Funeral March is not the last movement of the Eroica Symphony, but the second, so that suffering does not have the last word. (50)One could interpret much of the work of Beethoven by saying that suffering is inevitable, but the courage to fight it renders life worth living. Section III Writing Part A

51. Directions:

Write a letter of about 100 words to the president of your university, suggesting how to improve students' physical condition.

You should include the details you think necessary.

You should write neatly on the ANSWER SHEET.

Do not sign your own name at the end of the letter. Use "Li Ming" instead.

Do not write the address. (10 points)

Part B

52. Directions:

Write an essay of 160-200 words based on the following drawing. In your essay, you should

- 1) describe the drawing briefly,
- 2) interpret its intended meaning, and
- 3) give your comments.

You should write neatly on the ANSWER SHEET (20 points)

【参考范文】

Dear Mr. President,

I am a student of our university. I am writing this letter to bring forward multiple and effective suggestions to our college students about how to improve their body health.

Initially, exercising, though not a student's first priority in his/her daily life, should be stressed by all of us as well as our university, not only because it is vital to our physical health but mental health as well. Furthermore, developing a regular and healthy diet, which provides vitamins and other nutrients to our body, would, to some extent, undoubtedly benefit our body.

I hope that you will find my suggestions useful and propagandas be launched among the students.

Yours sincerely,

Li Ming

【参考范文】

As we can see, filial piety is prevailing all through the two pictures: in the first frame, an amiable mother is supporting her little daughter while in the second frame, her daughter, who has grown up, is supporting her aged mother instead.

What a happy family full of precious love! The implication conveyed in these two pictures is self-evident: we need to show our concern and respect to our parents. However, most of us fail to do this job. First of all, as our lifestyle gallops along, we are less likely to hold enough awareness on our filial piety. As young men who deem the career as the priority, they often choose to migrate with their jobs, work around the clock and rest with the work files, leaving parents in empty-nests. Besides, many people are used to substituting their care for parents with money or gifts. While it is beyond dispute that material support can improve ones' living standards, what those aged people need most is the

医学考研网

www.medkaoyan.net

mental satisfaction and love from their children such as a simple call, a short being back home.

It is easy to draw this conclusion that, to our parents, nothing can be better than the filial piety from children. Whenever possible, we should gather around the table for a “reunion dinner” with our parents; whether busy or not, we need to give our parents a call and tell them we are fine. Only with the sense our filial piety can our parents lead a really happy life.
